13 June 2003

(With Subsequent Corrections and Additions)

CHEMICAL HERITAGE FOUNDATION
Oral History Program
FINAL RELEASE FORM

This document contains my understanding and agreement with Chemical Heritage Foundation with respect to my participation in a tape-recorded interview conducted by

Arthur Daemmrich and David Brock on 13 June 2003.

I have read the transcript supplied by Chemical Heritage Foundation.

1. The tapes, corrected transcript, photographs, and memorabilia (collectively called the "Work") will be maintained by Chemical Heritage Foundation and made available in accordance with general policies for research and other scholarly purposes.
2. I hereby grant, assign, and transfer to Chemical Heritage Foundation all right, title, and interest in the Work, including the literary rights and the copyright, except that I shall retain the right to copy, use, and publish the Work in part or in full until my death.
3. The manuscript may be read and the tape(s) heard by scholars approved by Chemical Heritage Foundation subject to the restrictions listed below. The scholar pledges not to quote from, cite, or reproduce by any means this material except with the written permission of Chemical Heritage Foundation.
4. I wish to place the conditions that I have checked below upon the use of this interview. I understand that Chemical Heritage Foundation will enforce my wishes until the time of my death, when any restrictions will be removed.

Please check one:

a. _____

No restrictions for access.

NOTE: Users citing this interview for purposes of publication are obliged under the terms of the Chemical Heritage Foundation Oral History Program to obtain permission from Chemical Heritage Foundation, Philadelphia, PA.

b. _____

Semi-restricted access. (May view the Work. My permission required to quote, cite, or reproduce.)

c. _____

Restricted access. (My permission required to view the Work, quote, cite, or reproduce.)

This constitutes my entire and complete understanding.

(Signature) _____

John D. Baldeschwieler
John D. Baldeschwieler

Chemical Heritage Foundation, Philadelphia, Pennsylvania, 13 June 2003
(Philadelphia: Chemical Heritage Foundation, Oral History Transcript #0280).

Chemical Heritage Foundation
Oral History Program
315 Chestnut Street
Philadelphia, Pennsylvania 19106

The Chemical Heritage Foundation (CHF) serves the community of the chemical and molecular sciences, and the wider public, by treasuring the past, educating the present, and inspiring the future. CHF maintains a world-class collection of materials that document the history and heritage of the chemical and molecular sciences, technologies, and industries; encourages research in CHF collections; and carries out a program of outreach and interpretation in order to advance an understanding of the role of the chemical and molecular sciences, technologies, and industries in shaping society.

JOHN D. BALDESCHWIELER

1933 Born in Elizabeth, New Jersey on 14 November

Education

1956 B.S., chemical engineering, Cornell University
1959 Ph.D., physical chemistry, University of California, Berkeley

Professional Experience

1959-1960 1st Lieutenant, United States Army

Harvard University
1960 Chemistry Lecturer
1960-1962 Chemistry Instructor
1962-1965 Assistant Professor

Stanford University
1965-1967 Associate Professor
1967-1971 Professor

1971-1973 Deputy Director, Office of Science and Technology, Washington DC

1972-1976 Coordinator, Program in Chemical Catalysis, U.S.-U.S.S.R. Commission on Science and Technology

1978-1984 Chairman, Science and Technology Panel, Committee on Scholarly Communication with the People's Republic of China

1981-1993 Chairman, Board of Directors, Vestar Inc.

1988-1995 Director, Cryopharm Inc.

1993-1995 Director, Combion Inc.

1993-1999 Director, NeXstar Pharmaceuticals Inc.

1998-1999 Director, Epic Therapeutics Inc.

1998-2002	Director, Drug Royalty Inc.
1998-2002	Director, GeneSoft Inc.
1999-present	Managing Member, The Athenaeum Fund
2000-present	Director, Pasadena Entrectec
	California Institute of Technology
1973-1978	Chairman, Division of Chemistry and Chemical Engineering
1977-1979	Principal Investigator, California Institute of Technology Institutional Energy Program
1973-1999	Professor
1996-1999	J. Stanley Johnson Professor
1999-present	Professor Emeritus

Honors

1962-1965	Alfred P. Sloan Fellowship
1967	Award in Pure Chemistry, American Chemical Society
1968	Fresenius Award of Phi Lambda Upsilon
1970	National Academy of Sciences
1972	American Academy of Arts and Sciences
1979	American Philosophical Society
1989	Richard C. Tolman Medal, American Chemical Society
1990	William H. Nichols Medal, American Chemical Society
2000	National Medal of Science
2001	Award for Creative Invention, American Chemical Society
2002	Othmer Gold Medal, Chemical Heritage Foundation

ABSTRACT

John D. Baldeschwieler begins the interview with a discussion of his family and childhood interests. He was born in Elizabeth, New Jersey, on 14 November 1933. He attended a public school in Cranford, New Jersey, before moving on to college at Cornell University, where he majored in chemical engineering. Baldeschwieler found the chemical engineering program challenging, but despite the 80 percent dropout rate for the program, he graduated at the top of his class. Afterwards, he attended graduate school at the University of California at Berkeley, receiving his PhD in physical chemistry in 1959. Baldeschwieler had been in the ROTC program at Cornell University, but his service in the Army was deferred after he graduated because of an abundance of officers in the Army at that time; however, he was in the Army Reserves while he attended Berkeley. It was while at Berkeley that Baldeschwieler was introduced to infrared spectroscopy. Having served in the military, Baldeschwieler was hired as a chemistry lecturer and instructor at Harvard University. He became an assistant professor in 1962, and remained at the University until 1965, when he moved to Stanford University. Though he had been working in the field of nuclear-magnetic resonance at Cornell, Baldeschwieler decided to change his focus to ion-cyclotron resonance when he moved to Stanford. He became a full professor at Stanford in 1967, and remained with the University until 1971. From 1971 to 1984, Baldeschwieler worked in various important government positions, including the deputy director position for the Office of Science and Technology, and the coordinator position for the Chemical Catalysis Program in the U.S.-U.S.S.R. Commission on Science and Technology. Baldeschwieler began his relationship with Caltech during that time period as well. In 1973, he became chairman of Caltech's Chemistry and Chemical Engineering Division, and a full professor at the Institute. In 1981, Baldeschwieler undertook his first commercial endeavor with the creation of Vestar, Inc. Thus began his work on a string of entrepreneurial ventures, which has included Combion, Inc., Epic Therapeutics, Inc., GeneSoft, Inc., and many others. In 1999 and 2000, Baldeschwieler was responsible in part for the creation of the Athenaeum Fund and Pasadena Entrectec; two organizations established to fund and support young entrepreneurs from Caltech. Baldeschwieler concludes the interview with his thoughts on entrepreneurship and his experiences in the business world.

INTERVIEWERS

David C. Brock is Program Manager for Educational and Historical Services at the Chemical Heritage Foundation in Philadelphia. He is currently a Ph.D. candidate in the History Department, Program in the History of Science at Princeton University. In 1995, Mr. Brock received his M.A. in the History of Science from Princeton University and in 1992 he earned a M.Sc. in the Sociology of Scientific Knowledge from the University of Edinburgh.

Arthur Daemrich is a policy analyst at the Chemical Heritage Foundation in Philadelphia. He holds a Ph.D. in Science and Technology Studies from Cornell University and has published on biotechnology policy and politics, the sociology of medicine, and pharmaceutical drug regulation. In his research, he brings long-range perspectives to bear on

the analysis of globalization, risk, health, and environmental policy. Daemmrich has held fellowships from the Social Science Research Council/Berlin Program for Advanced German and European Studies, and the Kennedy School of Government at Harvard University.

TABLE OF CONTENTS

- 1 Childhood and Education
Father's and mother's origins. Childhood interest in science and mechanics. Attending Cornell University. Father's role in World War II. Interest in War research. Nuclear research at Los Alamos National Research Laboratory. Attending the University of California at Berkeley. Sputnik's influence on academic research. Infrared spectrometry at Berkeley. Ph.D. thesis work.
- 12 The Army and Harvard University
Working in the Ballistic Research lab at Aberdeen Proving Grounds. Joining the Harvard University faculty. Elias J. Corey. Receiving NIH funding for his double-resonance experiment. Robert B. Woodward. Ways to obtain NSF and NIH funding. William G. McMillan. Attending the seminars for young researchers.
- 19 Experiences at Stanford University
Moving to Stanford. Fourier transform NMR and pulse-NMR experiments. Deciding that NMR had reached its limits. Performing cyclotron experiments at Stanford. Getting a contract from NASA. Teaching at Harvard. Reasons for his interest in ICR. ICR within the context of mass spectrometry. The Omegatron. Collaborative work with Varian Associates, Inc. Jay Henis. Industrial consulting for Monsanto. Working with Merck. Working with Carl Djerassi.
- 29 Military Science during the Vietnam War
Assessing American tactics in Vietnam. The people sniffer. Tunnel detection with ground-penetrating radar. Working on PSAC. Working with the U.S. Navy Riverine Forces. The Hamlet Pacification Index. Reflections on the Vietnam War's results.
- 33 Working in the U.S. Government
Lee A. DuBridge. The usefulness of PSAC. Working under various U.S. presidents. The creation of the NEPA and the EPA. The politics of supersonic transport. Working on national security committees. Experimenting with radioisotopes at Stanford. Science in the Nixon administration. The "Berlin Wall." Working for NIH. The War on Cancer and the expansion of the National Cancer Institute. Work with China and the USSR.
- 45 Caltech Research and Commercial Ventures
T. Y. Shen. Work with liposomes. Building an angular-correlation instrument. Implanting tumors in mice for liposome tests. The creation of Vestar, Inc. H. S. Tsien's funding of Vestar. E. M. Warburg Pincus & Company. The downside of working with venture capitalists. Cancer imaging. Jill Alder's anti-fungal work.

NeXstar, Inc. QuanScan, Inc. Affymetrix, Inc. Vestink and DNA chips. Combion, Inc. Pasadena Entrectec and UCSD CONNECT for new entrepreneurs. Working as an advisor on various government committees. The Science and Technology Board.

60 Conclusion

The differing structures of advisory boards. The U.S. government's apathy towards foreign-oil dependence. Why advisory committees succeed or fail. Gulf War Syndrome. How QuanScan was formed. The Cryopharm Corporation and freeze-drying blood. The story of Combion. The Drug Royalty Company. GeneSoft, Inc. Working with the venture capital community. Language Weaver, Inc. The significance of the Department of Homeland Security. The anti-terrorism panel. Winning the ACS Award.
